

Mesic Herbaceous Vegetation

23 *Carex spp.*- *Juncus spp.* Wet Meadow Herbaceous Vegetation Mosaic Sedge-Rush Wet Meadow Herbaceous Vegetation Mosaic

Associations:

-*Carex utriculata* Herbaceous Vegetation
-*Carex nebrascensis* Herbaceous Vegetation
-*Equisetum (arvense, variegatum)* Herbaceous Vegetation
-*Juncus balticus* Herbaceous Vegetation

Common species:

Carex utriculata
Carex nebrascensis
Equisetum arvense
Equisetum variegatum
Juncus balticus

Project Specifics:

Frequency = 384 total polygons
68 polygons ZION, 316 polygons Environs
Area = 866 total acres
102 acres ZION, 764 acres Environs
Average Size = 2 acres

Photo Signature Example

Description:

Wet meadows common in the mid and higher elevations of ZION contain a very intricate mix of mesic graminoids. Typically this type appears green on the aerial photos with slender drainages weaving through the site. The lack of shrubs and trees helps identify and delineate this map class from the surrounding vegetation.
